

Life. Transformed.

28% of employers believe recent graduates are well prepared in essential workplace skills such as communication, emotional intelligence, time management, and conflict resolution.

–2025 report by the Society for Human Resource Management (SHRM)

80% of career success comes from soft skills
– Harvard Study

BURNING QUESTION-

**Why do many fresh graduates struggle to secure employment
despite strong technical knowledge?**

The Skills That Get You Hired

- ✓ Confidence
- ✓ Clear Communication
- ✓ Positive Body Language
- ✓ Professional Attitude
- ✓ Active Listening
- ✓ Strong First Impression
- ✓ Lasting Impact

Agenda

- Why interview preparation matters
- Frequently asked questions
- How to answer using examples
- STAR Method explained
- Practice & tips

Why Interviews Matter?

First Impression Counts - As a fresher, your interview is often the only chance to show your personality, confidence, and potential.

No Work Experience Yet - Your skills, projects, and attitude in the interview speak louder than your resume.

Opens the First Door - A good interview performance can land you your very first job, which sets the foundation for your career.

Learning Experience - Even if you don't get selected, every interview teaches you how to improve for the next one.

Builds Confidence - The more seriously you prepare, the more confident and professional you appear.

Competitive Edge - Freshers compete with hundreds of candidates; giving your best helps you stand out.

Commonly Asked Questions

01

Tell me

Are you ready
to relocate or
work in shifts?

Q7

How do you
manage your
time?

Q8

What is your
greatest
achievement
till now?

Tell me something about yourself

Greetings. My name is [Your Name], and I have recently completed my [Degree] from [College Name].

I have a good understanding of Java, Python, SQL, HTML, CSS, and JavaScript. I enjoy learning new technologies and solving problems. During my college, I worked on a project called [Project Name]. In this project, briefly explain what the project does in one or two lines. This project helped me improve my technical skills, teamwork, and problem-solving abilities.

Continued...

Apart from academics, I participated in a hackathon / won a hackathon / represented my state in [sport] / received [achievement or award].

These experiences taught me the importance of teamwork, discipline, and confidence. My strengths are that I am a quick learner, hardworking, and always willing to learn something new. I enjoy working with others and taking on new challenges. I am now looking for an opportunity where I can use my technical skills, learn from experienced professionals, and contribute to the growth of the organization while building my career.

Strengths & Weaknesses

Strength: I am self-motivated and enjoy learning new skills.

Weakness: I sometimes find it difficult to say "no" to additional work, but I am learning to manage my workload effectively.

Strength: I am a quick learner and adapt easily to new technologies

Weakness: I used to struggle with public speaking, but I practice regularly to become more confident.

(Never say - I don't have any weakness)

Why should we hire you?

One of my strengths is that I don't give up easily. If I don't know something, I take it as an opportunity to learn. During my college project, I learned a new technology that I had never used before. I practiced regularly and completed my task successfully. I also enjoy working with others because everyone has different ideas and we can support each other. I am confident that this willingness to learn and work as a team will help me do well in my job. That's the reason you should hire me.

Where do you see yourself in 2 years?

My goal over the next two years is to build a strong foundation in my career. I want to work on different projects, learn new technologies, and improve my problem-solving skills. I also want to become more confident, take ownership of my work, and be someone my team can rely on for completing tasks effectively.

Are you ready to relocate or work in shifts?

Yes, I am open to relocation and working in shifts. I understand that flexibility is part of many IT roles, and I am willing to adapt based on the company's needs. I see it as a good opportunity to learn, gain experience, and grow professionally.

How do you manage your time?

I manage my time by prioritizing tasks. I usually make a to-do list and set deadlines. For example, during my final semester, I had to balance exam preparation with my project submission. I created a schedule, dedicated fixed hours for each, and successfully managed both without missing deadlines.

STAR Method

STAR = Situation – Task – Action – Result

👉 It helps structure your answers with clarity.

S – Situation

- Describe the context or background.

T – Task

- Explain what you were responsible for or what challenge you had to solve.

A – Action

- Talk about the steps you took to complete the task or solve the problem.

R – Result

- Share the outcome of your actions. Be specific if possible.

Tell me about a project you worked on in college (STAR method)

- **Situation-** Our college library relied on manual registers to manage books, making it time-consuming to search books, track due dates, and manage records.
- **Task-** Our team developed a Library Management System, and I was responsible for designing and managing the backend database.
- **Action-** I used MySQL to create the database and integrated it with the Java application. I also helped implement features like book search, issue/return tracking, due date calculation, and a dashboard for easy record management.
- **Result-** The system reduced manual work, made library management more organized, and received positive feedback from both the faculty and the librarian for its usefulness and user-friendly design.

What is your greatest achievement till now? (STAR method)

- **Situation:** During my final year, our department organized a coding competition.
- **Task:** I participated as a team leader.
- **Action:** I prepared well, practiced coding problems daily, and guided my teammates.
- **Result:** We won second place, which boosted my confidence and improved my problem-solving speed.

TIPS FOR FRESHERS

- Be honest, don't fake answers
- Practice self-introduction
- Keep answers 'to the point' and structured
- Stay calm, smile, and maintain eye contact
- Practice, practice and practice

BEFORE THE INTERVIEW

- **Research the Company** – Know their products, services, culture, and recent news.
- **Understand the Role** – Read the job description carefully and match your skills.
- **Prepare Your Introduction** – Keep a 60–90 second self-introduction ready.
- **Practice Common Questions** – HR + Technical + behavioral questions.
- **Dress Appropriately** – Professional and neat; first impression matters. (FORMALS)
- **Plan Your Travel/Technology** – Arrive early or check your internet/camera if virtual.
- **Carry Essentials** – Resume, certificates, ID, and a notebook/pen, water bottle

DURING THE INTERVIEW

- **Be Confident** – Maintain good posture, smile, and make eye contact.
- **Listen Carefully** – Understand the question fully before answering.
- **Answer Using STAR Method** – Structure behavioral answers

(Situation, Task, Action, Result)

- **Be Honest** – Don't exaggerate your skills or experiences.
- **Show Enthusiasm** – Employers value motivation and a positive attitude.
- **If you don't know** – Politely say 'I don't know' and try to find out
- **Manage Time** – Keep answers concise and to the point.

AFTER THE INTERVIEW

- **Thank the Interviewer** – Politely thank them at the end of the interview.
- **Reflect on Performance** – Identify what went well and areas to improve.
- **Stay Patient** – Decisions may take time; don't overthink.
- **Prepare for Next Steps** – Keep improving skills and knowledge while waiting.

CONCLUSION

**Interviews are not tests of
memory, but a chance to show
your potential.**

So Practice → Confidence → Success
